## **DETAILED ACTION**

### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art discloses a shaft drive device having a pointer, a printed circuit board, a rotor, a shaft, a stator for driving the rotor and an attachment device. However, the prior art fails to show, in combination with the invention, a dial arranged on a front side of the printed circuit board and the dial and printed circuit board contacting each other and the attachment device for attaching the rotor device and the stator device to the printed circuit board in such a way that the printed circuit board device forms a part of the frame surrounding the rotor shaft and the shaft being provided with at least one radial bearing bush and the printed circuit board having an axial bearing bush cooperating with the radial bearing bush and attachment device is formed so that it axially supports the shaft on an opposite side of the printed circuit board and the attachment device has a lid which is attachable to a side of the printed circuit board facing away from the lid and which has an axial bearing bush for receiving a corresponding end of the shaft. Moreover, the applicant filed an official translated copy of the German Patent Application, which gives the US application the foreign priority date of February 14, 1998, making the Ogawa et al reference invalid due to the filing date (November 1998).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
